

## PROJECT PLAN: MICROBES AND MEDICATION IN ESNO NURSES GUIDE

### BACKGROUND.

In 2020 the ESNO created the Nurses information and communication Guide on microbes touching the overall aspect on microbes. This initiative was taken by the ESNO and to the background of a far too less awareness and knowledge related to vaccination, Antimicrobial resistance and infection prevention. These topics cannot be address with a good start on providing information on microbes and the dynamics with medication. This project was successful concluded in May 2020 with an online launch, as an alternative of the presentation on location.

A year later, health professionals and especially nurses are so much aware of the importance on knowledge, competence and attitude on microbes to understand the microbes from inside, their impact and how to act professional related to prevention to meet the soon upcoming innovations and professional expectations.

The natural step forward is to review the first guide and include those elements overlooked in the first version. Overtime it will be needed next versions will occur but in this year we need to update the first version and lay fundamentals for a structure for updates.

### MISSION VISION

To provide adequate and relevant knowledge on microbes such as bacteria, viruses, fungi and others that: Nurses can communicate professional to colleagues nurses and patients, can act professional and adequate in the clinic, to work with professional standards in interdisciplinary context and being ready and able to adapt to future developments.

### GOALS

The goal is update the Nurses information and communication and therefore also a uniform guiding document for nurses in Europe to learn about the full spectrum of microbes and medication. With this guide nurses, this can be a base for knowledge, underrating and triggering beside a higher competence level also interest in the subject throughout live time career span.

The full project will be carried out by the ESNO foundation: FoNSE

### ACTIVITIES

- Contacting the ESNO focus team on Microbes guide and setting up meeting.
- Create a form for new input on the new Module 1 and
- Suggested topics;
  - o Child immunisation schedules
    - Specific with threats
  - o Zoonoses
  - o PRIME system on EMA
  - o .....
  - o ...
- Create a full overview of all topics to include
- Revise the content with the original
- Agreement: with members consortium
- Planning activities
  - o Short term:
    - provide Nurses Guide as a starting fundament with basic activities (e.g. webinar)
    - Windowing the activities in social media and ESNO campaign.
  - o Long term:
    - Create transition

- E-learning
- Translation
- Budgets: create a short term and long term budget

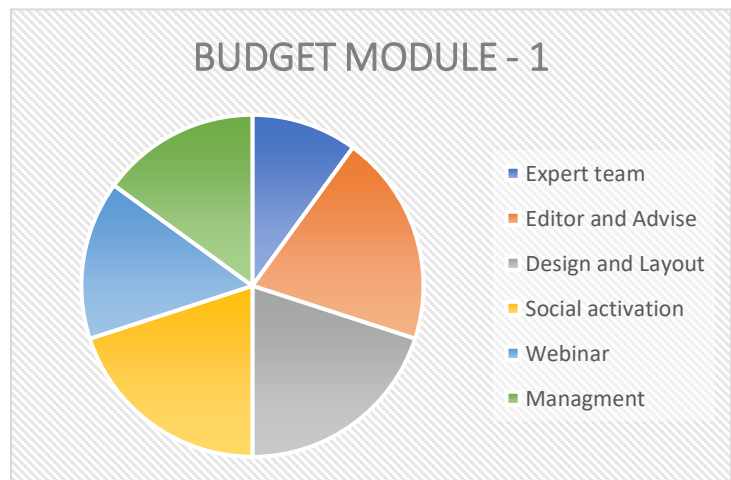

## WORKING METHODES

Times line : 2020 – 2021 – 2022

- 2021
  - Q1 – exploring the new elements to include
  - Q2 – Collect and rearranges to content
    - Initiate a meeting with full network for evaluation
  - Q3 – Editor to include all new elements
  - Q4 – Launch second edition
- 2022: create and online platform with half year evaluations

## BUDGET

- Experts
  - Specialist Nurses
  - Virologists
  - Phamacologists
- Peakwords [www.peakwords.com/](http://www.peakwords.com/)
  - Advise
  - Editorial work
- ZN consultancy [www.znconsulting.com/](http://www.znconsulting.com/)
  - Design and layout
  - Social media activation
- FoNSE [www.fonse.eu](http://www.fonse.eu)
  - Webinar
  - Management

## CONCLUSION

Based on discussions with key representative, we are convinced that we have touched the right tone in order to set out a range of activities to explore the feasibility on this topic but make it already successful when we even are able setting the first steps. We are looking forward to take with you the steps to meet the goals within the vision and mission of our project.

## LIST OF POTENTIAL ENGAGING ORGANISATION END PERSONS

- European Specialist Nurses Organisation – ESNO (confirmed)
- Foundation of Nurse Specialists Europe – FoNSE
- Experts TBC
